

For this challenge you should work through to the end of section seven in the [Getting Started with Rails tutorial](#).

Don't just read the tutorial, follow along. I'd also like you to keep track of any questions you may have along the way, as well as any problems that crop up.

This tutorial walks you through creating a new Rails app and building out CRUD actions for a few resources. It covers a lot of ground. If you feel overwhelmed please know that we will be reviewing all of this in more detail in the weeks to come.
